

## Department of Computer Engineering

Engineering at master's level in scientific and technological subjects in the fields of Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision and Image Processing, Natural Language Processing, Computer Networks, Robotics, Parallel and Distributed systems, Cloud Computing and Big Data, Data Mining, Data Security provides education. At the graduate level, it is aimed to gain the skills to expand and reach information in depth, evaluate, interpret and apply information by conducting scientific research in the field of engineering.
