

Department of Mechanical Engineering

The department provides engineering education on the fields of energy, thermal/fluid systems, control, dynamic and mechatronics, solid mechanics design and analysis, automotive, engineering materials and production, scientific and technological subjects at Master's and PhD levels. At the Master's level, it is aimed to gain the skills of reaching the knowledge deeply by doing scientific research in the field of engineering, the skills of evaluating, interpreting and applying the knowledge. At the doctoral level, it is aimed to educate engineers who will be able to research and produce information by getting international education, to serve the society and humanity by using it and to take the lead in technological developments in accordance with national needs.
