Sakarya University of Applied Sciences

Graduate Education Institute

Department of Field Crops

Department of Field Crops;

It is a large area in the Agricultural Engineering where cereals and edible legumes, industrial crops, meadow pasture and forage crops are produced.

The mission of the Field Crops MSc Program is to train Agricultural Engineers who will be able to produce solutions to the agricultural sector's problems, use these solutions in business life, convey them to the relevant segments and develop themselves in the face of changing conditions, based on the knowledge, skills and competencies acquired during the graduate education.

The mission of the Field Crops MSc Program to be a perfectionist graduate education program that respects universal scientific standards in all its activities, objectively, constantly improving itself by following the current problems faced by the agricultural sector in communication with the industry and its stakeholders.
