

The main purpose of the department is to train science experts who have the knowledge and skills needed both academically and in the sector in the field of tourism guidance, which is one of the specific and important fields related to tourism. In this context, the main goal of the department is to train experts who have comprehensive knowledge on topics such as terminology and methodology needed in the field of tourism guidance, and who can establish a relationship between traditional and modern events or phenomena by following current developments and new trends in their field, thanks to this information. In this process, gains such as the ability of experts to criticize and analyze, the technological dominance needed in the sectoral practice and scientific production process, the ability to produce independent and original publications, the ability to have a national and international communication network, the power of prediction, analysis and interpretation that shape the scientific development of the field are also targeted.
